ESI Mobile Messaging User Instructions

Use this sheet to setup your Voicemail to Email. After you have done this, you will be emailed the messages to your desired email address.

1. Press **PROGRAM** (or **PROG/HELP** on newer phones).
2. Press **6** for Notification
3. Press **5** for Unified Messaging.
4. Press **1** to set email modes.
5. Press **0** to set it to the main email mode.
6. Press **2** to enter the main email address
7. We are going to use the email **joe@advnetwork.com** as an example
8. Using the dial pad, begin entering the email address. For example, press the digit 5 once for "j".
9. When the character you want is selected, press **#** to move on to the next character.
10. Continue this until you are done entering all the characters up to the **@** symbol.
11. **To enter the @ symbol, press the # key again.** It should appear in the display.
12. Move on to the next part of the email address. *Special characters can be found by pressing the 0 key. For example, press the 0 key twice to enter a period (.).*
13. When done, press **#** key again.
14. It will ask you to set the option to attach the voice file to the email. In nearly all cases, this should be enabled. Press **1** to enable it.
15. Press **#** again.
16. Hang up. You should now receive voicemails over email. Leave yourself a test message.

Special Notes on Mobile Messaging

- Check your spam/junk folder if you haven't received your test message. Sometimes it ends up there.
- On Android OS devices, you may need to download a separate application that will do decode the WAV file to listen to the messages. We recommend Remote Wave. It's free and easy to use.
- You also can have an alternate email address which can be programmed as above, only select 1 in step 5 for alternate email. You cannot use both at the same time, however. It must be one or the other.
